

P26 Series - Pressure Management Valve

P26 series is a pressure management valve

1. P26M can switch two sets of pressure in six different time zones in one day. It helps to manage the pressure in different time zone when flow rate demand varies.
2. P26U can switch pressure based on high / low flow rate. The reading is from water meter with RS485.

FEATURES

- 10 years life lithium battery
- A black control box and solenoid valve connected to the control tube system.
- Controller box can be set either by timing or flow rate thru remote controller
- IP68 for water resistance
- Comply with BS EN 1074-5, ISO 5208, BS EN 12266-1, BS EN 558-1
- P26M - 6 different time zone with 2 different pressure in one day. Each day is independent for setting.
- Both P26M & P26U types has a control box and solenoid valve on the main valve.
- P26U- has 2 flow rate setting value (lower and higher level), to switch between the 2 different setting pressure
- P26U- same main valve as P26M. The purchaser can combine either an ultrasonic or magnetic meter which can provide a RS485 signal connected to the control box
- Single remote controller can be fitted for multiple valves setting use, no matter numbers of valves

Technical Data:

Size Range: DN50~DN800mm
Pressure Ratings: 1.0Mpa; 1.6Mpa; 2.5Mpa
Working Temperature:-10°C- 80°C Suitable
Media: Water
End connection: PN 10 / PN 16 / PN 25
Consult Factory for other applications

P26M:Time Based

P26U:Flow Rate Based

Pressure management advantage

Lower down the pressure based on time or flow rate are allowable to management the water distribution system

It helps to reduce the leakage rate in distribution system.

— Upstream pressure
— Flow rate – user demand
— Downstream pressure
